

Plot a Parabola With A +/-Unity Radius

=>Define a parabola focal point =>

Radius is set to +/- 300 points.....A Parabola follows the equation $y = x^2/(4*\text{focal})$

Plot a Parabola With A +/-Unity Radius

=>Define a parabola focal point =>

Radius is set to +/- 300 points.....A Parabola follows the equation $y = x^2/(4*\text{focal})$

Plot a Parabola With A +/-Unity Radius
